SUBE Demo Lesson

Spanish Beginner Level A

See how SUBE works!

The following 30 minute lesson will give you a sense of how the Sube multisensory methodology works. Just follow the eight steps below and let us know how it works for you!

Preparation:

- 1 Print out the **Animal flashcards** on to color paper, laminate and cut.
- 2 Print out the **Game Description** for instructions and teaching strategies.
- 3 Print out the **Worksheets and Take-Home Sheets**. One for each child.
- 4 Copy the **Animales Video Clip** to your computer. (Links to website www.sube.com)

Pre-Assessment:

Optional: Hand out the Activity Sheets and evaluate how much they know of the material before beginning.

Instructions:

- 5 Gather students in a circle on the floor. Play Show and Tell with the flashcards.
- 6 Play *Dónde Está?* Version 1, while the cards are laying on the floor from the Show and Tell game.
- 7 Gather the class around the classroom computer to view the Animales Video. Have the students call out the names of the animales.
- 8 Repeat this lesson several times throughout the week, playing the different version of the Donde Esta? game as the students are ready.

Evaluation:

Hand out a set of the Worksheets to each child. Either as a class or individually (depending on grade level) have the students review and answer the questions. Observe how much they have learned, but also how the excitement they feel about learning Spanish!

Parent Involvement: Send the **Take-Home Sheets** home with the child so that parents are involved in the learning.
